Assessing, Preventing, and Overcoming Reading Difficulties

A professional learning series presented by David Kilpatrick, Ph.D.

Module 4 Session 6

Sponsored by the Exceptional Student Services Unit (ESSU) and created in collaboration with Specific Learning Disability Specialists Jill Marshall and Veronica Fiedler
Module 4: WORD-LEVEL READING

Session 6: English Learners and Word-Reading Development
Objective:

Through engagement in this series of 13 on-demand webinars, participants will understand the current research, implications, and the essential elements necessary for assessing, preventing, and overcoming reading difficulties.

Module 4:
Word-Level Reading

4.1 The Challenges of Word-Level Reading
4.2 Word Reading Development
4.3 How Poor Phonological Skills Hinder Word Reading
4.4 Orthographic Mapping
4.5 Fluency
4.6 English Learners and Word-Reading Development
4.7 Understanding Word-Reading Difficulties
Learning Intentions

Module 4 Session 6: English Learners and Word-Reading Development

Participants will be able to:

- Identify the challenges faced by English Learners
- Describe the promise of teaching English Learners to Read
- Develop confidence regarding teaching English Learners word-level reading skills
• English Learners (ELs) are making up an increasing percentage of our school age population

• They are tasked with learning the content of math, science, physical education, music, art, computer, and of course reading and spelling, all while having a partial understanding of the English language
There is a large and growing body of research on ELs

The basic findings are

- ELs make much faster progress in word-level reading and spelling than reading comprehension and written expression
- The ability to learn to read in a new language (abbreviated in the research as L2, even if it is their third or fourth language) is highly correlated with success in L1
- Phonemic skill development in L1 directly corresponds to the phonemic skill development in L2
  - To the degree phonemes are similar between L1 and L2
  - The general metalinguistic concept also transfers
- Technically, you could successfully teach PA to native English speakers exclusively using Spanish words (but why would you?)
As a group, ELs, like native English speakers, have the same general word-reading pattern.

About 2/3rds of students will learn to read regardless of the nature of the reading instruction (in many cases, in spite of the reading instruction).

About 1/3rd will struggle and only make progress with explicit and systematic teaching of phonics and phoneme skills.

The good news is that for word-level reading, the potential for growth is similar to native speakers of English.
Reading Comprehension vs. Word-Reading

• Reading Comprehension is more of a challenge for most ELs than word-level reading
• The vocabulary, grammar, and even background knowledge comes much more slowly
• For those without general language impairments, there is a long, positive growth trajectory that takes several years to come close to catching up with native speakers
• However, semantic knowledge of words is not needed for orthographic mapping,
  • Only an entry into the phonological lexicon is required
  • EL students often function like hyperlexics
✓ English Learners (ELs) face many challenges in school
✓ Word-level reading is less challenging than reading comprehension
✓ Skills acquired in one language can be applied to the new language
✓ Phonological skills are roughly “transferable” from language to language
✓ Early on, ELs may function like hyperlexics
✓ As higher-level language skills grow, reading comprehension increases
Reflect and Connect:

How are EL’s similar to native speakers in regards to the way they acquire word-level reading skills in English?
What was your biggest takeaway?

What questions do you still have?
Module 4.7
Understanding Word Reading Difficulties
Thank you!
