

Student Population Indicators for the SHPG

This section provides an overview of the Student Population Indicators used for the School Health Professional Grant

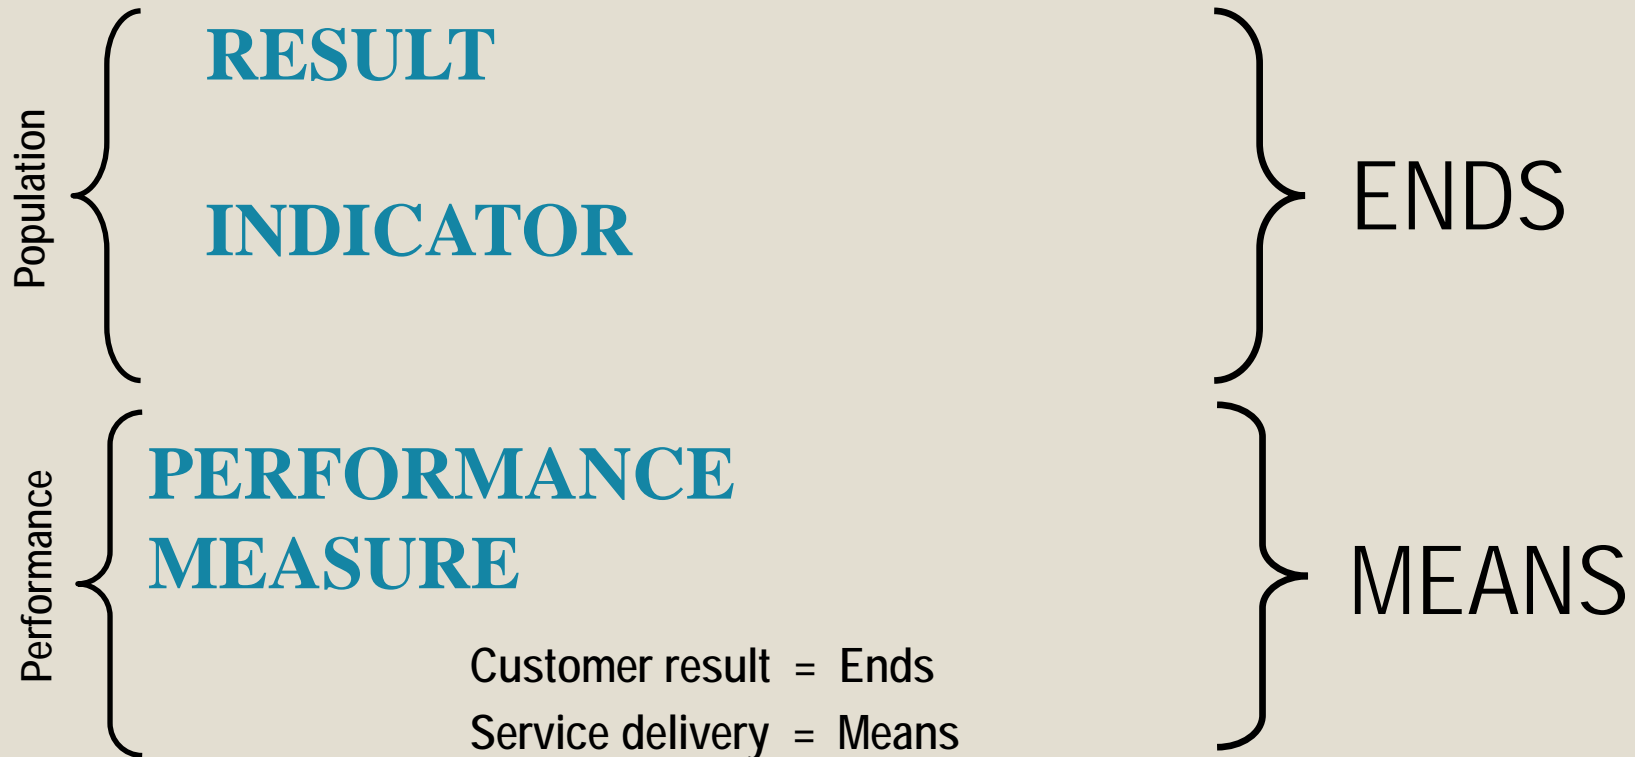

Results Based Accountability

Your SHPG can immediately impact Performance Accountability (via services, trainings, etc. for students and staff). Population Accountability, the results you want to see, is measured using Student Population Indicators.

From Ends to Means

From Talk to Action

Recall that RBA recommends starting with the “ends”, which for the SHPG is measured using Student Population Indicators. The “ends” are some of the conditions of well-being in schools that we would like to see.

SHPG Student Population Indicators for 2019-22 (Cohort 5) and 2020-23 (Cohort 6 and 6B)

Data are uploaded into Qualtrics by CDE

and % of students who have an adult to go to for help with a serious problem (HKCS)

and % of students (at SHP schools) who report positive attitude toward school (HKCS)

and % of students reporting use of illegal substances (HKCS)

Attendance and Truancy

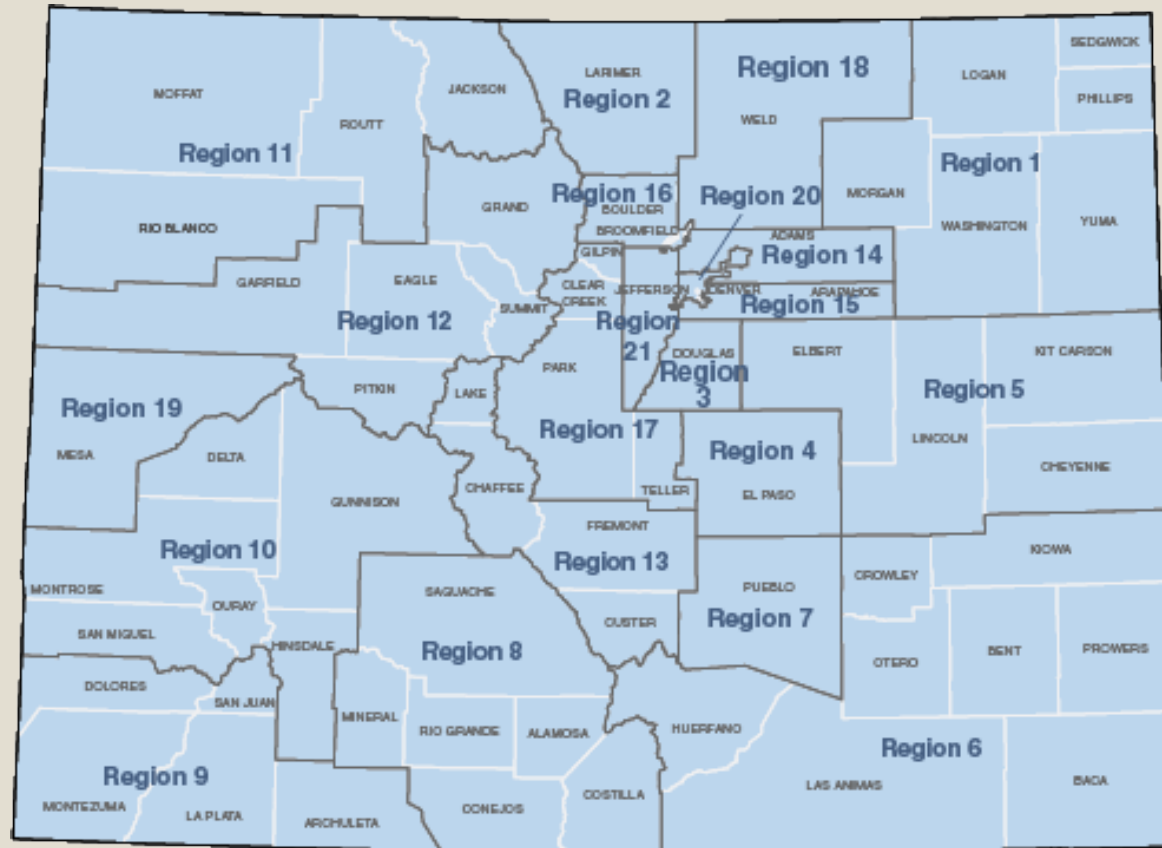

Suspension and Expulsion Rates

Dropout Rates

Graduation and Completion Rates

These Student Population Indicators are uploaded by CDE and will appear in your Results Report. You don't need to enter any data for them.

Healthy Kids Colorado Survey

HKCS data are reported by Health Statistics Regions (see map above).
